WOW!

Your Personality Style Is:

DRIVER SUPPORTER

Driver Supporters are adventurers, practical, dependable... but before you discover all the great things about yourself and the careers you'd be fantastic at - here's some information about the different personality styles. It will help you understand why you're a Driver Supporter and why your best friend could be something else.

The Four Personality Styles

MyCareerMatch uses four style identifiers, (D) DRIVER, (P) PROMOTER, (S) SUPPORTER and (A) ANALYSER.

When blended together in varying percentages, these four personality styles make us who we are. There's no right or wrong style and one style is not better than another. What's important is what you do with your talents, your skills, your education and how you get along with others.

Driver

Drivers are Adventurers

Strong willed and practical.
They like action and results.
Drivers want to lead, be the boss and win every challenge.

Promoter

Promoters are Socialisers

Outgoing, fun and charming.
They are great communicators who inspire others with their imagination.

Supporter

Supporters are Helpers

Kind, dependable and practical.
They are easy to get along with and enjoy helping people.

Analysers

Analysers are Thinkers

Great with facts and numbers.
They are well-organised, strive for accuracy and like to pay attention to details.

Understanding Your Personality Graph

This graph indicates how strongly each style influences your personality. The highest is your Dominant style. This is the one that governs how you behave most of the time. The second highest is your Backup style. It's like your co-pilot and kicks in when there's a need for balance and sound decision making. When styles are of equal percentage the order to determine your style is D, P, S then A.

Your Driver Supporter Style

Driver Supporters are determined caring people who set goals, work hard, focused and realistic. You like to have things done your way and be the boss. You don't like people who are all talk and no action. You're a practical person who is especially good at organising and planning.

You are patient, kind and friendly, and you don't take sides. Fancy things don't impress you; being loyal and honest are much more important. In fact, people respect and trust you because they know you are truthful. You choose your friends carefully and you are loyal to them. You will make a stand when it comes to your views and opinions. Although you are willing to try something new, you weigh all the risks first. You're always ready to help out and you don't mind being in the leader and showing the way. You are easy to get along with when everything is going okay. If not, though, you can be pushy and bossy until you get your way.

You are a creative person who comes up with sensible and practical ideas :)

Words That Describe You

**Competitive • Confident • Agreeable • Dependable • Straight Forward
Goal-Oriented • Logical • Loyal • Hopeful • Stubborn • Practical • Responsible
Independent • Strong-Willed • Organised • Trustworthy**

Things You Like

- Come up with ideas and practical suggestions
- Be in-charge and manage people
- Have ideas that work and are easy to do
- Get people to work together
- Help others succeed

What You're Good At

- Solving problems
- Managing people
- Getting results
- Being a leader
- Being loyal and caring
- Being here for others

What We Admire About You

- You are determined
- You are confident
- You aren't easily side-tracked
- You know what you want and you go after it
- You are easy to get along with
- You are trusting and caring
- You give people the benefit of the doubt
- You always follow through

How You Make A Difference

Being Positive

By offering encouragement you make a difference by helping others believe in themselves. Your positive reinforcement and upbeat outlook offers support to those in need.

Solving Problems

You are a natural and gifted problem solver. You make a difference by being able to get to the core of a problem and provide solutions that work. You see the problem as a challenge rather than a setback, and this gives you the clarity to see through it.

Accepting Challenges

You enjoy a challenge that uses your ability to think outside the box, be innovative and take action. You make a difference by encouraging others to get on with it, take calculated risks and challenge themselves.

Taking Charge

Your leadership skills compel you to take charge and be in control. You make a difference when it's needed to solve a problem because you are willing to back yourself. Your self-confidence and leadership qualities encourage others to follow and support you.

...And More!

Being Loyal

You are a trusted and loyal person who is good at keeping confidentiality. The difference you make is to be a trusted confidant and adviser.

Keeping Things Simple

You make a difference by making the difficult seem easy. Your skill is to keep things simple by identifying the steps needed to implement a plan. It's a great talent to have!

Being A Creative Thinker

You make a difference by being a visionary, a "future oriented" person who doesn't look back. You are good at developing plans, schemes and concepts, sometimes the bigger the better. Nothing is impossible. You use a logical approach to design and innovation.

Giving Great Advice

Even though you like to be in control and want things done your way, you make a difference by being open to advice by experts and will take this on board. You are also prepared to give advice and this is one of your strengths. You're a quick learner and value advice either when giving or receiving.

Driver Supporter Self-Improvement Tips :)

1. You can't always do it your way
2. What you say is as important as what you do
3. Slow down, relax and don't rush
4. Be patient with people you don't agree with.
5. Others have great ideas so listen to what they have to say
6. Respect everyone, be polite and don't trash
7. Be prepared to change your mind when a better idea or suggestion is made
8. Be big enough to apologise and say sorry
9. Compliment others, say nice things and mean it!
10. Give control to others and trust them

Your Strength Can Also Be Your Weakness

You've figured out that some people are like you and others are not. People are different. This doesn't make them better or worse than you, just different. Some people like action movies and others like comedy. Personal preferences determine your choice of music, clothes, hairstyle and friends.

How well you get along with others is a major factor in how successful you will be in your job and in the relationship you have with friends, partners, parents and teachers.

We each have personality behaviours that make us good at what we do but there are also behaviours that can make us look bad, annoy other people or get us into trouble.

As a Driver personality you enjoy activity, challenges, competition and you like to be in charge. You are strong willed, determined, practical and decisive. These are great strengths to have. But your strengths can become your weakness if you over use them. For example; you are courageous but this can lead to being reckless, you are results oriented and this can lead to you being pushy and because you are a confident person people sometimes see this as being too cocky, and since you are direct and tell it as it is, you can be seen to be rude. Generally the Driver weaknesses are getting angry to quickly, wanting to be the boss all the time, not caring about others and being impatient.

People will always admire and want the things that make you a Driver but be aware that there's an opposite side to your personality style that can annoy others.

For you to succeed and have a rewarding career you must use your strengths to develop skills that will help you to achieve your goals and dreams. Try to focus on the areas you are best at, most passionate about, and where your strengths allow you to perform at your highest level. That is how top achievers become successful in their careers and in life.

Now you know how awesome
your natural strengths and
talents are - it's time to match
your personality style to careers
you would love!

Careers we recommend

To find out more about each career industry, click an image and you'll be redirected to a safe career info site.

Your Career Personality Map

How To Interpret Your Career Personality Map

The Map is divided into the four MyCareerMatch styles, **DRIVER | PROMOTER | SUPPORTER | ANALYSER** and combinations of each style (DA, DP, DS etc.). Your style is shown as "YOU ARE HERE". The outer circle represents what you focus on and how you approach life. Drivers and Analysers focus on facts and figures, Promoters and Supporters focus on people and relationships. The middle circle represents what's important to you - for Drivers it's results for Promoters it's enthusiasm for Supporters it's sincerity and for Analysers, quality. The inner circle shows examples of careers that match your strengths.

Careers we suggest for YOU

Careers

Your no-nonsense work ethic combines well with your sensitivity to people's needs. You are easy to talk to and instil a sense of trust in others. You are a relationship builder, dedicated to fostering loyalty. You enjoy the exchange of ideas and information, and encourage others to pursue knowledge. People easily trust you and admire your confidence and strong will. Your commitment and methodical nature mean that you always follow through, and this combined with your people skills make you ideal for these careers.

Your Ideal Job Environment

Driver Supporters are best where:

- Are in charge and manage others
- Are challenged to use your talents
- Receive rewards for performance
- Can work at a fast pace but take time to consider choices
- Get to make decisions
- Are admired for doing a good job

Your Work Related Strengths

- Being practical and realistic
- Wanting to be successful at whatever you do
- Being kind and generous
- Being loyal to people and organisations that you care about
- Being motivated by winning and reaching your goals
- Looking at what's going on and seeing what needs fixing
- Taking risks and try new things

The suggested jobs are based on current best prospects in each industry. When considering a career investigate the employment opportunities as they vary depending on economic circumstances and demand. [Visit Australian Jobs to find out.](#)

Agriculture & Farming

Gone are the days when careers in Agriculture and Farming only meant toiling under the sun while waiting for your crops to grow. Nowadays, the field has advanced in so many ways that numerous opportunities have sprouted over time, giving young people plenty of options to pick from.

Curiosity • **Passion** • Innovator • **Great Communicator**
Problem Solver • **Self-Belief** • Reliability

Future Jobs

Preparing Students For Jobs That Don't Exist Yet

We want to share with you the current thinking on jobs of the future and skills that will be in demand in the next 20 years. Whilst we can't tell you what these jobs are or which ones will disappear, we can look at the trends and see the direction of employment and career opportunity.

One of the easiest ways to begin thinking about future careers is to focus on what may be a problem in the future and invent a job that will solve it. For example, if cars are to be autonomous (drive themselves) we will need the services of Smart Car Interior Designer who redesign what the inside of a car will look like.

Those educated are more likely to find jobs and secure employment than those that are not. However, education is not a guarantee to a job. Employment and education are linked and having in demand qualifications means secure employment.

New technologies will make some occupations redundant. Automation, robotics and artificial intelligence will impact on existing jobs but many new jobs will be created using these technologies. The rise of new disruptive technologies will occur quickly and there's a shortage of people with the skills to manage and transition to new products and services.

Not all jobs will disappear. Just as not all jobs disappeared when computers were introduced. Today computers help people do a better job; so, automation and robotics will help you do a better job in the future.

Of the non-technology jobs, occupations such as Aged & Child Care, Education, Training, Sales, Construction & Trades, Business and Personal Services will grow. Those studying science, technology, engineering and mathematics (STEM) will find more jobs require this knowledge and expertise. Almost all jobs will require you to be digitally smart and expect you to know more than just the basics.

Not all jobs require a University degree so consider your options in vocational, apprenticeship and skills training. Most countries have a shortage of skilled labour so there is opportunity for employment.

6 Trends Shaping Our Future

Population

Population is getting older: Biotechnology, genome research and medical science technologies are helping people live better quality lives, curing many diseases.

Ai

Rise of smart machines and systems: Artificial Intelligence (AI) Robots, Autonomous Vehicles and Drones will create new jobs and new materials.

Devices

Smart Portable Devices with powerful processors: Computers will disappear and be replaced by mobile devices. This will require new media and communication tools, apps and data analytics.

Big Data

Business collects more data about us analysing what we buy, eat, wear, listen, watch, play, read and like.

Global Trade

Being able to buy and sell anywhere at any time has more people doing business internationally and purchasing online.

Internet

Connecting us to a network of physical devices, vehicles, home appliances and other items embedded with electronics, software, sensors, actuators, and network connectivity.

Sally Hickson

Driver Supporter

www.MyCareerMatch.com.au

STEM

Get Ready To Have One Exciting Career If You Study STEM. There's a huge variety of awesome career paths open to you with a qualification in either **Science, Technology, Engineering or Maths** + STEM based skills are in demand in the job market.

Entertainment

From the design of video games, to special effects for films, to sound engineering for the music industry.

Health

From hospitals and healthcare professionals caring for patients, to inventing new high tech life-saving equipment to pharmaceutical companies researching new medicines.

Energy & Environment

From inventing new technologies to reduce carbon emissions, to developing new energy sources such as wind, waves and sun, to protecting rare species of animals.

Aerospace & Transport

From making travel easier for people whether on the roads, rail or in the air, through to helping goods be transported around the world for trade and humanitarian relief.

Construction

From architecture and design, to civil engineering of everything from bridges, railways and roads, to homes and parks and constructing buildings to planning towns.

Information & Technology

From the technology used in our mobile phones, to software designs which give us access to the internet, to managing international communications networks.

Sport & Fashion

From inventing new high performance sports equipment, to physiotherapy for athletes, from new textiles to computer aided design of new fashion ranges.

Food & Agriculture

From developing new high yielding plant varieties to feeding more people around the world, to cooking up new recipes for supermarkets, to farming the land.

Not everyone goes to Uni

3 Study Alternatives

Not everyone goes to university. If you're undecided about what to do after you leave school, talk to your careers adviser, teacher or parents.

Many parents encourage their kids to go to university because university qualifications open more opportunities. If you want to be a doctor, then university medical school is a pretty clear-cut decision. But if you want to pursue one of the thousands of jobs that don't require a degree, then a VET course or apprenticeship may be perfect for you. There are many ways to succeed.

FUN FACT

Your brain contains half a galaxy of tiny computers. Woo Hoo!

Vocational Education & Training

VET courses provide practical and work-orientated occupational skills, whereas university or higher education courses are focused on theory-based knowledge and professional careers. VET courses offer a wide range of certifications depending on the course requirement. Some Advanced Diplomas can lead to a bachelor degree and many universities offer vocational training, so you can go to Uni but do a VET course.

myskills.gov.au
courseseeker.edu.au
tafecourses.com.au

Apprenticeship & Traineeships

One of the benefits of an apprenticeship is you 'earn as you learn'. Apprenticeships provide a nationally recognised qualification as well as work experience highly valued by employers. There are over 500 apprenticeships to choose from, many are non-trades. Most popular are technicians and trades, community and personal services, IT, hospitality, transport, construction, and sales.

EXPLORE

australianapprenticeships.gov.au
aapathways.com.au

Online Learning

Many people choose to study online because it fits their personal circumstances. You can study from home if you're working full time or looking for a job. Online study doesn't suit everyone. But if you are well organised, can stick to a routine, and are willing to give up your spare time, online study may be right for you. Most universities and training organisations offer online study.
